

Retail media needs more intelligence

It only targets customers you already know (loyalty members, logged-in users).

It relies heavily on past purchases, not future intent.

AI CPGs want more: better insights, better targeting, and better measurement.

Privacy changes mean traditional ID-based targeting is disappearing.

Limited audience and limited insight, relying on:

al Loyalty data
Logged in users
On-site browsing

Transaction history EPOS data
Resulting in:
a Small, finite audiences

No view of shoppers you don't already know

Limited predictive understanding of who is likely to buy next

No real understanding of total share of wallet
